

COST REDUCTION

Fibre broadband gives business the means to take-up services that can have a very real impact on the bottom line. For example, Voice Over IP (VoIP) solutions and video conferencing offer real savings in operational costs.

Cut IT costs

By moving to cloud based services for CRM, billing and support, the cost of technology infrastructure can be minimized.

Cut travel costs

Why travel to meetings when high quality video conferencing is available? Save costs, improve carbon footprint and staff work-life balance.

Save time

Time is money. With faster upload and download speeds, business works more efficiently.

Recent research

82.9% of businesses surveyed, in research carried out by Plymouth University in conjunction with Buckman Associates in November 2013, indicated that their company had saved time and/or money as a result of using fibre broadband.
